

Air1 radio station has made a huge impact on my life. It provides me with something positive to listen to during my day rather than the typical junk about sex and violence and other things. Were air1 to be replaced by LPFM broadcasting, I would no longer have any uplifting station to turn on that I and my friends could enjoy even in mixed company. I believe that air1 benefits the whole community because it provides something families can enjoy and it is a message of hope and encouragement for all who listen.
